

## SPAC Meeting 10/8/04 Meeting Minutes

1. Meeting called to order 1:35 pm by SPAC Chairman
2. Minutes approved from 6/11 meeting with minor revisions
3. Pat Crowley presented final rule changes to board – summary of rule revisions

Summary:

- Splash plate/spreader bar required for all that land apply
- Screening required for those licensees whose litter control is not working
- Rules specify minimum requirements for screen size
- Photographic evidence of spreader/splash plate/screen is acceptable
- Sanitarians can reject sites for public health/nuisance reasons
- Site withdrawal based on protection of human health and environment reasons
- Inspectors must present credentials
- Advance notice of inspection is not required
- Records to be submitted semi-annually
- Sanitarians may request O&M plan
- Winter screening is not required (December, January, February) – BUT litter pickup must be done after snowmelt
- Copy of amended rules incorporated into rule package to be sent with license renewal in November

Pat then opened the floor to questions – members questioned process of comments and subsequent Department response to comments – commentors under the impression that they would be formally responded to, prior to final rule amendment. Pat then explained the process and indicated that there is no provision for formal response to comments other than within the amended/final rule document.

The suggestions was made that the SPAC should determine how they would like comments addressed, if a formal response is requested prior to rule amendment, and present that to the Agency for further discussion

4. Rick Thompson addressed the board on the projected fee increase calculation  
The program has been operating with a shortfall, and as a result, the program has been operated under the solid waste licensing fee funds. Fee increase proposed at \$300/year – earliest passage would be April, 2005 – increase would not go into effect until 2006 at the earliest.  
Training is proposed to be a component of the result of the fee increase.  
Certification may be a component in the future.  
Motion made and passed to increase annual licensing fee to \$300 with % of this fee to be set aside for training/education. Copy of bill draft to be presented to SPAC at December meeting.

5. George Scriba – ENFD unable to attend this meeting but will provide update at next meeting on enforcement issues and discussion of issues related to car wash sump wastes.
6. SPAC requested information on PSC regulation of pumpers to set up service areas and fees. Some pumpers have expressed an interest in establishing service areas. Meeting with PSC representative set up at the conclusion of the next board meeting.

Next meeting scheduled for December 10, 2004  
12:00 – 3:00

Agenda Items:

Discussion of PSC regulation

Rick provide funding projection for fee increase Discussion of proposed fee increase

Idaho training requirements for STPs - Rule/law for certification – can state have continuing ed requirement as part of license
